

NX-1048-W

LCD menu keypad - designer housing - white

General

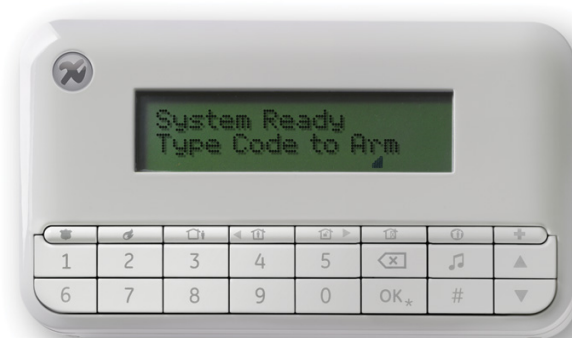

The new designer keypad together with the NX-10 allows for an easy and quick installation. The new design allows for blending in with the home décor. The NX-1048 keypad has the same shape, keys and Menu structure as the wireless version, so it establishes the new standard of Keypads for the NetworX range.

Functionality

It supports Menu Programming as well as Location programming for the Panel. With these new features it can be used on existing NetworX V2 Panels.

The display shows information as well in text with 2 lines of 16 characters as well in an icon row below for quick information. All icons on keys and on the displays are following now one standard.

For maintenance, the keypad can be flash upgraded with the latest software through an onboard USB port.

Standard Features

- Designer housing
- Text and icon display
- White LCD and key backlight
- NetworX panel compatible
- Menu or location programming support
