

## ZW-7000

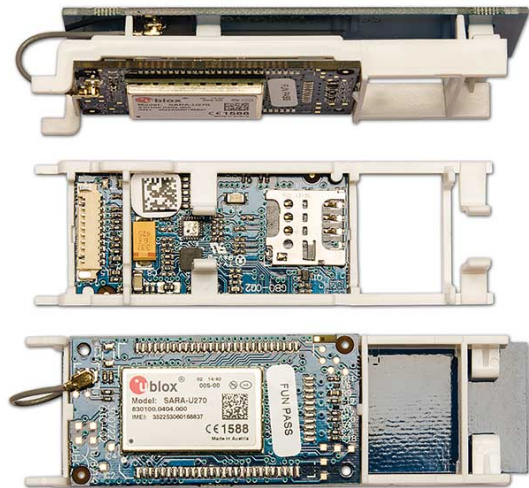

ZeroWire 3G radio module with SIM card

### Communication

This module can serve as a back-up or as a primary connection and offers a secure cellular communication channel to any central station that is connected to the UTC Cloud solution. The ZeroWire 3G radio module provides a secure channel for Up/Download as well as the mobile interface for the APP connectivity.

### Secure & Fast

The ZeroWire 3G radio module uses a multi network SIM card for fast and secure transmission of an alarm message, the multi network SIM will roam up to three networks depending on the coverage, to help ensure the best cellular performance is achieved.

### Standard Features

- 3G cellular communication
- Broad service area coverage
- Integrated antenna
- External antenna as an option
- Plug-in module for ZeroWire panel
- Easy to install and maintain
